

Instagram Launch Strategy

A focused 30-day plan to build local demand, support partner venues, and convert attention into paid challenge entries.

Make the challenge the content

Instagram should sell the feeling of competing - not explain the software behind it.

CORE CAMPAIGN IDEA

Five shots. One target. How close can you get?

The strategic thesis

Pin2Win is naturally visual: pressure shots, close calls, reactions, rivalries, leaderboard movement, and recognizable local venues. A consistent stream of these moments can turn entertainment into measurable local demand.

The customer journey

1. DISCOVER

A local golfer sees an exciting Reel or venue collaboration.

2. PLAN

They visit the location page and book a simulator session.

3. PLAY

Onsite, they scan the protected QR code and enter the challenge.

4. MULTIPLY

Their result, reaction, or win creates the next piece of content.

30-DAY OBJECTIVE

Prove that one repeatable local content system can increase venue interest, booking clicks, QR scans, paid entries, and reusable player content.

Local competition first

Build an entertaining golfer community while quietly demonstrating value to venue operators.

Primary audience: local golfers (80%)

- Indoor golf and simulator customers who already understand the setting.
- Recreational golfers motivated by friendly competition and measurable improvement.
- League players, golf groups, date-night customers, and social groups.

Secondary audience: venue operators (20%)

- Indoor golf owners, golf bars, simulator lounges, teaching studios, and event operators.
- Show them visible proof of activity, repeat visits, customer engagement, and content creation.

Brand guardrails

DO	DO NOT
Lead with competition, emotion, personalities, and local pride.	Lead with software screens, payment details, or technical explanations.
Be energetic, credible, welcoming, and skill focused.	Present the experience as wagering, chance, or guaranteed winnings.
Build depth in one local market before expanding.	Try to look national before the local model has been proven.

A profile built to convert curiosity

Every profile element should help a golfer understand the challenge and find a participating venue.

PROFILE NAME

Pin2Win | Indoor Golf Challenges

BIO

Five shots. One target. Monthly indoor golf challenges. Find a location below.

Five Story Highlights

HOW IT WORKS

Book, scan, pay, play, and verify.

LOCATIONS

Venues and direct booking links.

LEADERBOARD

Standings and weekly movement.

WINNERS

Verified wins and interviews.

RULES

Eligibility, scoring, and timing.

Three pinned posts

- A 15-second 'What is Pin2Win?' Reel.
- A simple four-step 'How to play' carousel.
- The current venue and active challenge.

TRAFFIC RULE

General Instagram traffic should go to a public location or booking page - never directly to the protected onsite QR checkout.

Consistency without content fatigue

Use a fixed weekly rhythm and rotate repeatable creative formats.

CONTENT PILLAR	SHARE	ROLE
Challenge drama	40%	Shots, near misses, reactions, pressure, leaderboard changes.
Player stories	25%	Personal bests, rivalries, profiles, and winner interviews.
Venue + community	20%	Venue tours, staff attempts, groups, and atmosphere.
Education	10%	How entry, scoring, and verification work.
Company story	5%	Building Pin2Win and launching new locations.

Weekly cadence

MONDAY Leaderboard or weekend recap Reel.	WEDNESDAY Challenge, near-miss, or player Reel.
FRIDAY Partner-venue collaboration Reel.	SUNDAY Educational or recap carousel.

PRODUCTION STANDARD

Shoot vertical 9:16, use clear audio, keep key text inside the safe zone, and communicate the premise in the opening seconds.

Four weeks from introduction to payoff

Each week advances the story instead of restarting it.

WEEK	THEME	KEY OUTPUTS
1	Introduce	Core campaign Reel; how-it-works carousel; founder or staff attempt; venue collaboration; Highlights.
2	Make it social	Slow-motion near miss; golfer to beat; staff leaderboard; club-choice polls; collect repost permissions.
3	Build competition	Leaderboard movement; two-shot comparison; booking-to-play journey; deadline countdown.
4	Urgency + payoff	Final-week reminder; reaction compilation; verified winner; interview; next challenge teaser.

Repeatable Reel hooks

NEAR MISS

This missed by less than two feet.

FINAL SHOT

His fifth shot changed the leaderboard.

CLUB CHOICE

Five shots. What club are you choosing?

NEW LEADER

We have a new leader - and it wasn't close.

30-DAY TARGET

12 Reels | 4 carousels | 4 venue collaborations | Stories on active days | 8+ reusable player or staff clips

Turn the venue and every player into distribution

The strongest growth loop already exists at the point of play.

What the launch venue provides

- One collaboration post per week and two or three Story reshares during active weeks.
- Filming permission, one staff participant, a trackable booking link, and staff QR reminders.

What Pin2Win provides

- Finished captions, edited vertical clips, Story graphics, leaderboard cards, and a simple posting calendar.
- The lower the workload for the venue, the more consistent the partnership will be.

Player-generated content loop

PROMPT

Invite verified players to follow and tag Pin2Win and the venue.

PERMISSION

Ask before reposting player footage, results, or reactions.

RECOGNITION

Celebrate strong shots, personal bests, and verified winners.

REUSE

Convert authentic moments into future Reels, Stories, and recaps.

DISCLOSURE GUARDRAIL

Do not trade cash or prizes for likes, follows, shares, or comments. Use the paid-partnership label when free play, payment, or another benefit is exchanged for content.

Buy measurable local attention

Meta ads are auction-priced. These are controllable planning budgets, not guaranteed platform rates.

Five ways to promote Pin2Win

OPPORTUNITY	SUGGESTED TEST	BEST USE
Boost a proven Reel	\$10-\$15/day x 7 days	Fast awareness test using an existing organic winner; simplest setup, but less control.
Local traffic campaign	\$20-\$30/day x 14 days	Recommended core campaign; sends nearby golfers to a public venue or booking page.
Warm retargeting	\$5-\$10/day x 14 days	Deadline or booking message for prior viewers, engagers, and tracked visitors.
Venue partnership ad	\$150-\$300 media	Amplifies an approved collaboration post and borrows trust from the host venue.
Local creator ad	\$150-\$300 media + talent	Adds authentic third-party credibility; creator compensation is negotiated separately.

RECOMMENDED TOOL

Use a simple boost for awareness experiments. Use Meta Ads Manager for the main pilot because it offers better control over objectives, audiences, placements, creative tests, destinations, and reporting.

A \$600-\$900 recommended pilot

Start after 15-20 organic posts reveal which creative deserves paid distribution.

30-day media budget options

LEAN VALIDATION

\$300-\$450 | Test two or three Reels near one venue.

RECOMMENDED

\$600-\$900 | Test, concentrate spend, then retarget.

ACCELERATED

\$1,200-\$1,800 | More creative and sustained local reach.

How the campaign works

STAGE	ACTION	DECISION
1. Prepare	Confirm eligibility; connect accounts; add tracked links and available website measurement.	Do not launch until policy and destination-page checks pass.
2. Test	Run near-miss, explainer, and venue Reels against the same local audience.	Change one major variable at a time.
3. Focus	Pause clear underperformers and move most remaining spend to the strongest creative.	Use qualified traffic and downstream activity, not views alone.
4. Retarget	Show deadline, leaderboard, or booking messages to warm audiences once large enough.	Keep the warm budget smaller than prospecting.
5. Review	Reconcile ad results with booking clicks, QR scans, entries, and revenue.	Scale, revise, or stop using unit economics.

PRODUCTION COST

Media spend excludes filming, editing, and creator compensation. In-house production can keep costs low; outside creator or editing fees should be negotiated separately with deliverables and usage rights defined.

Connect every dollar to the funnel

Reach and clicks are diagnostic signals; bookings, scans, and entries determine business value.

Audience and placement approach

- Target adults within a practical driving radius of the venue; adjust for real local travel patterns.
- Begin broad inside that geography. Test golf interests separately instead of stacking restrictions.
- Supply native 9:16 video with audio and safe-zone text; begin with Advantage+ placements.
- Use venue or creator partnership ads only with documented promotion access and usage rights.

Break-even framework

MAXIMUM AFFORDABLE ACQUISITION COST

Entry revenue - prize allocation - venue share - payment fees - other variable costs - required profit contribution

MODELED ACQUISITION COST

Cost per landing-page visit / landing-page-to-paid-entry conversion rate

Illustration: a \$1.50 landing-page visit and a 5% visit-to-entry rate produce a modeled \$30 acquisition cost. This example is not a forecast; replace both inputs with Pin2Win's measured results.

Pilot decision rules

- Do not scale inexpensive views unless they produce qualified traffic.
- Do not scale inexpensive clicks unless bookings, scans, and entries follow.
- Stop or revise a campaign when acquisition cost exceeds the affordable maximum.

Define success before launch

The reporting view should connect Instagram activity to customer and venue outcomes.

What to measure

LEVEL	MEASURES
Content	Watch time, completion, shares, saves, profile visits, and meaningful engagement.
Traffic	Location-page visits, cost per visit, booking clicks, and cost per booking click.
Business	QR scans, paid entries per scan, acquisition cost per entry, repeat entries, and contribution.

Weekly review questions

CREATIVE

Which hook creates qualified visits, not only inexpensive views?

FUNNEL

Where do people drop between page visit, booking, scan, and entry?

ECONOMICS

Is cost per entry below the approved acquisition ceiling?

ACTION

What should be scaled, refreshed, paused, or measured better?

POLICY GATE

Meta says accounts promoting online real-money games of skill require prior written permission. Confirm advertising permission, broader account eligibility, and legal positioning before launch; keep messaging transparent and skill focused.

Approve one focused 30-day pilot

Launch around one venue, one geographic market, and one accountable operating rhythm.

First 14 days

- Finalize the profile, public link, Highlights, and three pinned posts.
- Confirm venue filming, collaboration, and player permission workflows.
- Run one two-hour filming session and capture at least 20 vertical clips.
- Edit the first six Reels before publishing the first one.
- Add tracking to the venue link and record the baseline funnel data.
- Review results after days 7 and 14; repeat the two strongest concepts.

Five decisions to make together

OWNERSHIP

Who films, edits, posts, and responds?

MARKET

Which venue and local area launch first?

PERMISSIONS

What approvals are needed to film and repost?

DESTINATION

Which public page receives and tracks traffic?

COMPLIANCE

Who confirms Meta ad eligibility before spending?

RECOMMENDATION

Approve the organic pilot now. Build around competition, personalities, and proof; make the venue a co-distributor; measure the full booking-to-entry funnel; and delay paid promotion until creative and policy eligibility are confirmed.
